

STATEMENT OF PURPOSE

“Education is the most powerful weapon we can use to change the world”. The importance of education was always imbibed in me by my parents. As a child, I used to teach underprivileged kids in the neighbourhood by giving them tuitions. I had decided to pursue engineering at a very early age, and my dream came true when I joined XXXXXX XXXXX for under graduation. While in college, I played Basketball and represented my team at College, State and University Levels. I was also appointed as the sports representative of my branch and was in the sports core committee.

After my graduation, I joined XXXXXX Limited. After learning my roles and responsibilities, I actively engaged in a Quality Circle Group, as continuous improvement is better than delayed perfection. With my team, I have completed three projects all of which have been rated excellent, and one of which was awarded “The best innovation Award”.

In my time here, I realized that to progress in the corporate world, I would need more skills and knowledge, and the desire to pursue MBA was born. I wanted to get into a premium B-School, which would help me hone my managerial skills and would eventually carve me into a business professional.

With my technical skills polished, I now wish to develop my managerial skills to move up in the corporate ladder. My keenness to learn new things and developing myself guided by the well structured program offered by your university will allow me a chance to gain exposure to the corporate world and become a successful manager. The demanding curriculum at NMIMS will always encourage me to delve deeper and the diverse student community will provide me a great opportunity to grow intellectually.
