

SOP Sample Workshop

Logics has always inspired me and backed my decision to pursue Computer Engineering from Chitkara University. I joined Wipro as a Software engineer in July 2014. Experience and observation made me realize the importance of a skilled and educated administrator. Thus I choose to take my next step towards professional progress by applying to MBA.

My dedication towards my interests has helped me to achieve my goals. During the 4th year of my college, I was one of the few students selected to pursue 1 year internship, which helped me achieve corporate exposure. I topped in the training program of Wipro and received appreciation and award. During my current project a significant achievement was when i was made offshore lead of my team within a short span of 1 year.

My immediate goal is to get business education in financial services from one of India's leading business schools as it will help me pursue my interest of stock market. My mid-term goal is to gain experience while working on various assignments for a reputed company. I believe that a MBA, with the right peer interaction will go a long way in meeting my long-term career goal of being a top executive of a financial conglomerate.

NMIMS delivers programs that cater to market requirements. NMIMS is well connected with corporate and leaders often come to address students. Equipped with financial expertise and professional skills learned in your University, I will be prepared for the challenges that I will encounter. With passion to achieve my goals, I will surely be a value add to NMIMS. With the leadership qualities taught by my present job, I am confident that I will be able to take up the challenges and hardships of the course work and also contribute meaningfully in all endeavors to your University.
