Section 1 - Verbal Section 34 questions 60 minutes

Directions for questions: The passage given below is followed by a set of questions. Choose the best answer to each question.

Language is not a cultural artifact that we learn the way we learn to tell time or how the federal government works. Instead, it is a distinct piece of the biological makeup of our brains. Language is a complex, specialized skill, which develops in the child spontaneously, without conscious effort or formal instruction, is deployed without awareness of its underlying logic, is qualitatively the same in every individual, and is distinct from more general abilities to process information or behave intelligently. For these reasons some cognitive researchers have described language as a psychological faculty, a mental organ, a neural system, and a computational module. But I prefer the admittedly quaint term "instinct". It conveys the idea that people know how to talk in more or less the sense that spiders know how to spin webs. Web-spinning was not invented by some unsung spider genius and does not depend on having had the right education or on having an aptitude for architecture or the construction trades. Rather, spiders spin spider webs because they have spider brains, which give them the urge to spin and the competence to succeed. Although there are differences between webs and words, I will encourage you to see language in this way, for it helps to make sense of the phenomena we will explore.

Thinking of language as an instinct inverts the popular wisdom, especially as it has been passed down in the canon of the humanities and social sciences. Language is no more a cultural invention than is upright posture. It is not a manifestation of a general capacity to use symbols: a three-year-old, we shall see, is a grammatical genius, but is quite incompetent at the visual arts, religious iconography, traffic signs, and the other staples of the semiotics curriculum. Though language is a magnificent ability unique to Homo sapiens among living species, it does not call for sequestering the study of humans from the domain of biology, for a magnificent ability unique to a particular living species is far from unique in the animal kingdom. Some kinds of bats home in on flying insects using Doppler sonar. Some kinds of migratory birds navigate thousands of miles by calibrating the positions of the constellations against the time of day and year. In nature's talent show, we are simply a species of primate with our own act, a knack for communicating information about who did what to whom by modulating the sounds we make when we exhale.

Once you begin to look at language not as the ineffable essence of human uniqueness but as a biological adaptation to communicate information, it is no longer as tempting to see language as an insidious shaper of thought, and, we shall see, it is not. Moreover, seeing language as one of nature's engineering marvels — an organ with "that perfection of structure and co-adaptation which justly excites our admiration," in Darwin's words - gives us a new respect for your ordinary Joe and the much-maligned English language (or any language). The complexity of language, from the researcher's point of view, is part of our biological birthright; it is not something that parents teach their children or something that must be elaborated in school — as Oscar Wilde said, "Education is an admirable thing, but it is well to remember from time to time that nothing that is worth knowing can be taught." A preschooler's tacit knowledge of grammar is more sophisticated than the thickest style manual or the most state-of-the-art computer language system, and the same applies to all healthy human beings, even the notorious syntax fracturing professional athlete and the, you know, like, inarticulate teenage skateboarder. Finally, since language is the product of a well engineered biological instinct, we shall see that it is not the nutty barrel of monkeys that entertainer columnists make it out to be.

1. According to the passage, all of the following stem from popular wisdom on language Except?

- (1) Language is a cultural artifact. (2) Language is a cultural invention.
(3) Language is learnt as we grow. (4) Language is a psychological faculty.
2. Which of the following can be used as parallel reasoning for the “spiders know how to spin webs” analogy as used by the author?
(1) A kitten learning to jump over a wall (2) Bees collecting nectar
(3) A donkey carrying a load (4) A horse running a Derby
3. According to the passage, which of the following is unique to human beings?
(1) Ability to use symbols while communicating with one another.
(2) Ability to communicate with each other through voice modulation.
(3) Ability to communicate information to other members of the species.
(4) Ability to use sound as means of communication.
4. According to the passage, complexity of language cannot be taught by parents or at school to children because
(1) children instinctively know language. (2) children learn the language on their own.
(3) language is not amenable to teaching. (4) children know language better than their teachers or parents.
5. Which of the following best summarizes the passage?
(1) Language is unique to Homo sapiens. (2) Language is neither learnt nor taught.
(3) Language is not a cultural invention or artifact as it is made out.
(4) Language is instinctive ability of human beings.
6. Why author has referred to ‘preschooler’s tacit knowledge of grammar’
(1) To prove that Language is unique to Homo sapiens. (2) Used as an analogy for healthy human beings
(3) To prove his point that language is not a cultural invention or artifact as it is made out.
(4) To compare children instinctively know language.

Directions for questions: The passage given below is followed by a set of questions. Choose the best answer to each question.

If American policy towards Europe in the postwar years had been a conspicuous success, and towards Asia a disappointing balance between success and failure, it could be said that the most conspicuous thing about relations with Latin America was the absence of any policy. Franklin Roosevelt, to be sure, had launched a “Good Neighbour” policy, but being a good neighbour was, it seemed, a negative rather than a positive affair, a matter of keeping hands off, of making the Monroe Doctrine, in form at least, multilateral. All through the postwar years, the states of Latin America - - Mexico and Chile were partial exceptions - - were in the throes of major economic and social crises. Population was growing faster than in any other part of the globe, without a comparable increase in wealth or productivity; the gap between the poor and the rich was widening; and as the rich and powerful turned to the military for the preservation of order and privilege, the poor turned to revolution.

Deeply involved in other quarters of the globe, the United States paid little attention to the fortunes or misfortunes of her neighbours to the south, and when she did intervene, it appeared to be on the side of order and the status quo rather than on the side of reform. So frightened was the United States of “Communism” in Latin America that it preferred military dictatorship to reformers who might drift too far to the “left”, and sustained a Batista in Cuba, a Trujillo in the Dominican Republic, a Peron in Argentina, and a Jimenez in Venezuela.

In his last two years, President Eisenhower had tried to mend his Latin American fences. Though rejecting a Brazilian proposal of a Marshall Plan for Latin America, he did take the initiative in setting up an Inter-American development Bank with a capital of one billion dollars, almost half of it supplied by the United States. Other government investments in Latin America ran to some four million dollars, while private investments exceeded nine billion. Yet though to most Americans, all this seemed a form of economic aid, many Latin Americans regarded it as economic imperialism. In September 1960, came a co-operative plan that could not be regarded as other than enlightened: the Act of Bogota, which authorized a grant of half a billion dollars to subsidize not only economic but social and educational progress in Latin America. “We are not saints”, said President Eisenhower when he visited Santiago de Chile, “We know we make mistakes, but our heart is in the right place”.

But was it? President Kennedy was confronted by the same dilemma that had perplexed his predecessors. Clearly it was essential to provide a large-scale aid to the countries south of Rio Grande, but should this aid go to bolster up established regimes and thus help maintain status quo, or should it be used to speed up social reforms, even at the risk of revolt? As early as 1958, the then Senator Kennedy had asserted that “the objective of our aid program in Latin America should not be to purchase allies, but to consolidate a free and democratic Western Hemisphere, alleviating those conditions which might foster opportunities for communistic infiltration and uniting our peoples on the basis of constantly increasing living standards”.

This conviction that raising the standards of living was the best method of checking Communism now inspired President Kennedy's bold proposal for the creation of the alliance for progress - - a ten year plan designed to do for Latin America

what Marshall Plan had done for Western Europe. It was to be “a peaceful revolution on a hemispheric scale, a vast cooperative effort, unparalleled in magnitude and nobility of purpose, to satisfy the basic needs of the American people for homes, work, land, health and schools. “To achieve this, the United States pleaded an initial grant of one billion dollars, with the promise of additional billions for the future.

7. Following World War II, which problem was the United States most concerned with regarding Latin America?
(a) Economic stability. (b) Political ideology. (c) Religious persecution. (d) Military dictatorship.
8. A key reason why Latin American rejected the Inter-American development Bank was that
(a) it primarily provided money for social reform subsidies.
(b) the moneys provided were only for specific performance projects.
(c) it constituted an extension of the Marshall Plan into Latin America
(d) it was being used as a means to control the economic destiny of Latin America.
9. Which of the following is most closely associated with the concept of a Marshall Plan for Latin America?
(a) The Good Neighbour Policy. (b) The Alliance for Progress. (c) The Act of Bogota. (d) The Monroe Doctrine.
10. According to the passage, the fundamental change in U.S. foreign policy directed towards Latin America
(a) resulted in a deterioration of U.S. Latin American relations.
(b) was responsible for Peron remaining as a dictator in Peru.
(c) recognized that economic aid alone would prevent social revolutions.
(d) provided for increased military and economic aid to prevent the spread of communism in Latin America.
11. All of the following statements are true, except?
(a) Mexico and Chile did not experience the general social crises that are common to the majority of Latin American countries.
(b) President Eisenhower continued in practice the theory that economic aid was the best defense against communist incursion into Latin America
(c) The Good Neighbour Policy favoured a multilateral interpretation of the Monroe Doctrine.
(d) The traditional U.S. approach in Latin America was to protect the status quo.
12. Which of the inferences can be drawn if everything said in the passage were assumed to be true?
(a) Rebellions are fuelled by social reforms and avoided by supporting established authorities or continuing the present state of affairs.
(b) The American policy towards Asia can be called an overall success, though small in magnitude.
(c) Kennedy, in 1958, wanted America to aid South American countries to acquire more support in their fight against communism.
(d) Eisenhower rejected the Marshall Plan, whereas Kennedy implemented a similar one.

Directions for questions: The passage given below is followed by a set of questions. Choose the best answer to each question.

Last fortnight, news of a significant development was tucked away in the inside pages of newspapers. The government finally tabled a bill in Parliament seeking to make primary education a fundamental right. A fortnight earlier, a Delhi-based newspaper had carried a report about a three-month interruption in the Delhi Government's 'Education for All' programme. The report made for distressing reading. It said that literacy centres across the city were closed down, volunteers beaten up and enrolment registers burnt. All because the state government had, earlier this year, made participation in the programme mandatory for teachers in government schools. The routine denials were issued and there probably was a wee bit of exaggeration in the report. But it still is a pointer to the enormity of the task at hand.

That economic development will be inherently unstable unless it is built on a solid base of education, specially primary education, has been said so often that it is in danger of becoming a platitude. Nor does India's abysmal record in the field need much reiteration. Nearly 30 million children in the six to ten age group do not go to school — reason enough to make primary education not only compulsory but a fundamental right. But is that the solution? More importantly, will it work? Or will it remain a mere token, like the laws providing for compulsory primary education? It is now widely known that 14 states and four Union Territories have this law on their statute books. Believe it or not, the list actually includes Bihar, Madhya Pradesh (MP) and Rajasthan, where literacy and education levels are miles below the national average. A number of states have not even notified the compulsory education law.

This is not to belittle the decision to make education a fundamental right. As a statement of political will, a commitment by the decision-makers, its importance cannot be undervalued. Once this commitment is clear, a lot of other things like

resource allocation will naturally fall into place. But the task of universalizing elementary education (UEE) is complicated by various socio-economic and cultural factors which vary from region to region and within regions.

If India's record continues to appall, it is because these intricacies have not been adequately understood by the planners and administrators. The trouble has been that education policy has been designed by grizzled mandarins ensconced in Delhi and is totally out of touch with the ground reality. The key then is to decentralise education planning and implementation. What's also needed is greater community involvement in the whole process. Only then can school timings be adjusted for convenience, school children given a curriculum they can relate to and teachers made accountable.

For proof, one has only to look at the success of the district primary education programme, which was launched in 1994. It has met with a fair degree of success in the 122 districts it covers. Here the village community is involved in all aspects of education — allocating finances to supervising teachers to fixing school timings and developing curriculum and textbooks — through district planning teams. Teachers are also involved in the planning and implementation process and are given small grants to develop teaching and learning material, vastly improving motivational levels. The consequent improvement in the quality of education generates increased demand for education.

But for this demand to be generated, quality will first have to be improved. In MP, the village panchayats are responsible for not only constructing and maintaining primary schools but also managing scholarships, besides organising non-formal education. How well this works in practice remains to be seen (though the department claims the schemes are working very well) but the decision to empower panchayats with such powers is itself a significant development. Unfortunately, the Panchayat Raj Act has not been notified in many states. After all, delegating powers to the panchayats is not looked upon too kindly by vested interests.

More specifically, by politicians, since decentralisation of education administration takes away from them the power of transfer, which they use to grant favours and build up a support base. But if the political leadership can push through the bill to make education a fundamental right, it should also be able to persuade the states to implement the laws on Panchayat Raj. For, UEE cannot be achieved without decentralisation. Of course, this will have to be accompanied by proper supervision and adequate training of those involved in the administration of education. But the devolution of powers to the local bodies has to come first.

13. None of these problems are plaguing the education system in India Except
a. poverty. b. diverse cultural and socio-economic factors. c. male chauvinism. d. Celebrating festivals
14. In the context of the passage, the term 'grizzled mandarins' means
a. old hags. b. decrepit men. c. ineffective old men. d. None of these
15. One of the reasons contributing to India's poor performance on the education front is that
a. its leaders do not have the conviction required to improve the education system.
b. male members of society do not want their female counterparts to be educated.
c. administrators in charge of education are out of touch with ground realities.
d. the country does not have the law for implementation of education policies in its statute books.
16. The only way in which the education system can be improved is by
a. decentralising education planning and implementation.
b. introducing fresh blood in the planning body.
c. injecting funds into the exchequer solely for the purpose.
d. educating the people on the need for primary education.
17. Primary education
a. is a fundamental right. b. will be made a fundamental right. c. is only for the privileged sections of society. d. None
18. One of the ways in which education policy can be successfully implemented as mentioned in the passage, is
a. greater community involvement. b. greater community development. c. greater community awareness. d. Both (a)(b)

Directions for questions: The passage given below is followed by a set of questions. Choose the best answer to each question.

In a poor country like India, as income rises people first concentrate on increasing their consumption of what they regard as basic or more essential consumer goods. For the poor, these goods would primarily include cereals and for people at successive levels of higher income protective foods, simple non-food consumer goods, more modern, better quality non-food consumer goods and simple consumer durables, better quality consumer goods, and so on. When the demand for basic and more essential consumer goods is more or less met, demand for the next higher level of consumer goods begins to impinge on consumer decision making and their consumption increases. There is thus a hierarchy of income levels and a

hierarchy of consumer goods. As incomes rise and one approaches the turning point referred to, there is an upward movement along the hierarchy in the demand for consumer goods which exhibits itself in a relative increase in the demand for these goods.

If one examines the past consumption behaviour of households in India, one finds confirmation of the proposition just made. Until the mid-seventies one notices a rise in the proportion of consumption expenditure on cereals, and thereafter, a steady decline reflecting a progressive increase in the relative expenditure on non-cereal or protective foods. About the same time the rising trend in the share of food in total consumption expenditure also begins to decline, raising the proportion of expenditure on non-food consumer goods. Simultaneously one also notices a sharper rise in the proportion of expenditure on consumer durables. Thus, what one sees is an upward movement in consumer demand along the hierarchy of consumer goods which amounts to a major change in consumer behaviour. There are two features of this change to which attention particularly needs to be drawn.

19. As income rises in a poor country like India, the poor people concentrate on increasing their consumption of
(a) protein foods (b) modern, non-food consumer goods (c) cereals (d) protective foods

20. Whenever there is a decline in the proportion of consumption expenditure on cereals
(a) it reflects an increase in the expenditure on non-cereal protective foods.
(b) it does not reflect an increase in the expenditure on non-cereal or protective food.
(c) it reflects a further increase in the expenditure of cereal foods.
(d) Both (a) and (b)

21. According to author, In the approach to the seventh plan, the overall impression was that priority should be given to
(a) food grains (b) protective foods (c) non-food products (d) the identification of consumer behavior

On a personal level, winning doesn't mean the other guy has to lose. As former P&G brand manager Bruce Miller put in, 'It's not a zero-sum game. It's more like golf than tennis, you are playing against yourself and the course, not the guy across the net or in the next office. Play your best game and, if it's good enough, you'll be a winner. You might not achieve the specific goal you have set, but the company is big enough and flexible enough to move you up and onward in a way that suits your talents. That's winning.' Miller remembers the story of an assistant brand manager who, by his own account, was achieving great things and looked as if he had the world by the tail. At about the time his "class" was ready to go out on sales training, he had a closed-door meeting with his boss. His peers assumed he was the first to get the nod. It turned out his performance had all along been more flash than substance, and the meeting with his boss was to discuss other career alternatives inside or outside the company. Miller is convinced that the moral of the story is that winning is all about your own performance and not about keeping up with what the other guy seems to be doing.

Former CEO ED Artzt equates winning with professionalism: It's mastery of the fundamentals. And that's what you must do to win in management. You must master the fundamentals of the business you're in, the functions you perform, and the process of managing people. If you don't do that, you'll eventually become a journeyman or journeywoman, and the brilliance you once had will surely tarnish. Mastering the fundamentals of any profession, be it in the arts, sports, or business, requires great sacrifice, endless repetition, and a constant search for the best way to do things. A professional in search of mastery brings an attitude to his or her work that no sacrifice is too great, and no experience or grunt work is too menial if it helps achieve mastery of the fundamentals. It all begins with attitude, striving to attain professionalism and embracing winning as a way of life. If you want to become a winning manager, I urge you to embrace that attitude with all your might.

22. What does Miller mean when he says that winning is not "a zero sum game"?
(a) It does not mean that the other guy has to lose. (b) You are playing against yourself. (c) It's more like golf than tennis.
(d) The company is big enough to move you up.

23. By "more flash than substance," the author means
(a) the achievement was temporary, not lasting. (b) the achievement was more a matter of chance. (c) the manager was fooling himself. (d) None of the above

24. The best title for the passage could be
(a) Winning (b) Winning and Professionalism (c) Getting a Winner's Attitude (d) Winning and losing

Answer the following question on the basis of this paragraph and mark the correct option in the given box.

25. Parents usually do not insist that their children learn to walk by a certain age. Parents feel confident that the children will learn to walk within a reasonable period of time, when their bodies are ready for such an undertaking. Teachers should adopt the same attitude when teaching children in school how to read. If teachers did this, children might learn to read much more quickly and experience less anxiety while doing so.

Which of the following best describes the Essence or structure of the passage?

- A. How children learn one kind of activity is described and then this method is recommended for teaching children another kind of activity.
- B. Two different views of how children should be taught to read are compared and contrasted.
- C. A view of how children should be taught is described and then criticized.
- D. Contrasting views of parents and teachers on how quickly children actually learn are described and then analyzed.
- E. The amount of time it takes for children to learn one kind of activity is described and then used to predict how long it will take them to learn another kind of activity.

TITA:

26. The sentences given, when properly sequenced, form a coherent paragraph. Each sentence is labeled with a letter. Choose the most logical order of sentences from among the given choices to construct a coherent paragraph. Sentence 1 and 6 are fixed starting and ending of the paragraph. Type the correct order in the given space.

1. Amount of published information available varies widely by industry.

A. Unfortunately for the researcher, many industries do not meet these criteria, and there may be little published information available.

B. Generally, the problem the researcher will face in using published data for analysing an economically meaningful industry is that they are too broad or too arranged to fit the industry.

C. However, it is always possible to gain some important information about an industry from published sources and these sources should be aggressively pursued. D. Larger the industry, the older it is, and the slower the rate of technological change, better is the available published information.

6. If a researcher starts a searching for data with this reality in mind, the uselessness of broad data will be better recognized and the tendency to give up will be avoided.

TITA:

27. In the following question a paragraph from which the last sentence has been deleted. From the given options, choose the sentence that completes the paragraph in the most appropriate way. Type the correct option number in the given space below.

Trade protectionism, disguised as concern for the climate, is raising its head. Citing competitiveness concerns, powerful industrialized countries are holding out threats of a levy on imports of energy-intensive products from developing countries that refuse to accept their demands. The actual source of protectionist sentiment in the OECD countries is, of course, their current lacklustre economic performance, combined with the challenges posed by the rapid economic rise of China and India - in that order.

(1) Climate change is evoked to bring trade protectionism through the back door.

(2) OECD countries are taking refuge in climate change issues to erect trade barriers against these two countries.

(3) Climate change concerns have come as a convenient stick to beat the rising trade power of China and India.

(4) Defenders of the global economic status quo are posing as climate change champions.

(5) Today's climate change champions are the perpetrators of global economic inequity.

TITA:

28. Answer the following question on the basis of this paragraph and mark the correct option in the given box.

Whatever their disadvantage with respect to distributing education tax dollars equally among school districts, in one respect at least, local property taxes are superior to state taxes as a means of funding public schools. Because local property taxes provide public schools with a direct source of revenue, these public schools are relatively free from competition for tax dollars with other government services. School administrators do not have to compete for a share of the state tax dollars, which are already being spent on health, criminal justice, public safety, and transportation. They are not placed in the position of having to argue that school programs must have priority over other public services financed by state taxes.

Which of the following statements best expresses essence of the passage?

A. Education is more important than other government services, such as criminal justice or public safety.

B. The disadvantage of local property taxes is that they do not equally distribute tax dollars spent on education.

C. School administrators are not accustomed to arguing that their programs must have priority over other government services.

D. Financing education with local property taxes has the advantage of eliminating competition for funding between schools and other public services.

E. School administrators must be prepared to justify the funds they spend on education programs.

29. In the following question a paragraph from which the last sentence has been deleted. From the given options, choose the sentence that completes the paragraph in the most appropriate way. Type the correct option number in the given space below.

Most people at their first consultation take a furtive look at the surgeon's hands in the hope of reassurance. Prospective patients look for delicacy, sensitivity, steadiness, perhaps unblemished pallor. On this basis, Henry Perowne loses a number

of cases each year. Generally, he knows it's about to happen before the patient does: the downward glance repeated, the prepared questions beginning to falter, the overemphatic thanks during the retreat to the door.

- (1) Other people do not communicate due to their poor observation.
- (2) Other patients don't like what they see but are ignorant of their right to go elsewhere.
- (3) But Perowne himself is not concerned.'
- (4) But others will take their place, he thought.
- (5) These hands are steady enough, but they are large.

30. The sentences given, when properly sequenced, form a coherent paragraph. Each sentence is labeled with a letter. Choose the most logical order of sentences from among the given choices to construct a coherent paragraph. Sentence 1 and 6 are fixed starting and ending of the paragraph. Type the correct order in the given space.

1. Intensity of competition in an industry is neither a matter of coincidence nor bad luck.
- A. The collective strength of these forces determines the ultimate profit potential in the industry where profit potential is measured in terms of long run returns on invested capital.
- B. Rather, competition in an industry is rooted in its underlying economic structure and goes well beyond the behavior of current competitors.
- C. Not all industries have the same potential.
- D. The state of competition in an industry depends on five basic competitive forces.
6. They differ fundamentally in their ultimate profit potential as the collective strength of the forces differs.

31. Answer the following question on the basis of this paragraph and mark the correct option in the given box.

Shakespeare wrote four types of plays: histories, comedies, tragedies, and tragicomedies. Some scholars contend that Shakespeare's choice of three of these types of dramatic forms reflects his various psychological states. As a young man making a name for himself in London, he wrote comedies. Then, saddened by the death of this son, he turned to tragedies. Finally, seasoned by life's joys and sorrows, he produced tragicomedies. But a look at the theater scene of his day reveals that Shakespeare was not so much writing out of his heart as into his pocketbook. When comedies were the vogue, he wrote comedies; when tragedies were the rage, he wrote tragedies; and when tragicomedies dominated the stage, he produced tragicomedies.

Which of the following statements best expresses essence of the passage?

- A. Examine Shakespeare's life in light of his dramatic works
- B. Contest a theory that attempts to explain why Shakespeare wrote the kinds of plays he did
- C. Explain the terms "comedy," "tragedy," and "tragicomedy" as they are used in discussions of Shakespeare's plays
- D. Compare Shakespeare's plays with the works of other dramatists of his day
- E. Discuss what is known about Shakespeare's psychological states

32. The sentences given, when properly sequenced, form a coherent paragraph. Each sentence is labeled with a letter. Choose the most logical order of sentences from among the given choices to construct a coherent paragraph. Type the correct order in the given space.

- A. A few months ago I went to Princeton University to see what the young people who are going to be running our country in a few decades are like.
- B. I would go to sleep in my hotel room around midnight each night, and when I awoke, my mailbox would be full of replies—sent at 1:15 a.m., 2:59 a.m., 3:23 a.m.
- C. One senior told me that she went to bed around two and woke up each morning at seven; she could afford that much rest because she had learned to supplement her full day of work by studying in her sleep.
- D. Faculty members gave me the names of a few dozen articulate students, and I sent them e-mails, inviting them out to lunch or dinner in small groups.
- E. As she was falling asleep she would recite a math problem or a paper topic to herself; she would then sometimes dream about it, and when she woke up, the problem might be solved.

33. In the following question a paragraph from which the last sentence has been deleted. From the given options, choose the sentence that completes the paragraph in the most appropriate way. Type the correct option number in the given space below.

Mattancherry is Indian Jewry's most famous settlement. Its pretty streets of pastel coloured houses, connected by first-floor passages and home to the last twelve saree-and-sarong-wearing, whiteskinned Indian Jews are visited by thousands of tourists each year. Its synagogue, built in 1568, with a floor of blue-and-white Chinese tiles, a carpet given by Haile Selassie and the frosty Yahel selling tickets at the door, stands as an image of religious tolerance.

CAT 2018 Expected paper

- (1) Mattancherry represents, therefore, the perfect picture of peaceful co-existence.
 (2) India's Jews have almost never suffered discrimination, except for European colonizers and each other.
 (3) Jews in India were always tolerant.
 (4) Religious tolerance has always been only a façade and nothing more.
 (5) The pretty pastel streets are, thus, very popular with the tourists.

Overall Strategy		
Correct	Percentile	Time / ques
8	70	3
12	80	5
16	90	3.8
20	99	3.0
24	99.5	2.5
28	99.99	2.1

34. The sentences given, when properly sequenced, form a coherent paragraph. Each sentence is labeled with a letter. Choose the most logical order of sentences from among the given choices to construct a coherent paragraph. Type the correct order in the given space.

1. The main source of power in industrial undertaking is electricity.
 A. Electricity from water also requires enormous river valley projects involving huge expenditure.
 B. In contrast, electricity from atomic power stations will result in a tremendous saving in expenditure.
 C. Besides, the mineral resources of the world required for generation of electricity are being rapidly depleted.
 D. But the production of electricity needs huge quantities of coal.
 6. The installation of atomic plants will help in meeting the shortage of these resources.

Section 2 - DILR Section 32 questions 60 minutes

Answer the following questions based on the information given below: In a sports event, six teams (A, B, C, D, E and F) are competing against each other. Matches are scheduled in two stages. Each team plays three matches in Stage – I and two matches in Stage – II. No team plays against the same team more than once in the event. No ties are permitted in any of the matches. The observations after the completion of Stage – I and Stage – II are as given below.

Stage-I:

- One team won all the three matches.
- Two teams lost all the matches.
- D lost to A but won against C and F.
- E lost to B but won against C and F.
- B lost at least one match.
- F did not play against the top team of Stage-I.

Stage-II:

- The leader of Stage-I lost the next two matches
- Of the two teams at the bottom after Stage-I, one team won both matches, while the other lost both matches.
- Once more team lost both matches in Stage-II.

1. The two teams that defeated the leader of Stage-I are: (1) F & D (2) E & F (3) B & D (4) E & D
2. The only team(s) that won both matches in Stage-II is (are) (1) B (2) E & F (3) A, E & F (4) B, E & F
3. The teams that won exactly two matches in the event are (1) A, D & F (2) D & E (3) E & F (4) D & F
4. The team(s) with the most wins in the event is (are): (1) A (2) A & C (3) F (4) B & E

Answer the following questions based on the information given below:

Abdul, Bikram and Chetan are three professional traders who trade in shares of a company XYZ Ltd. Abdul follows the strategy of buying at the opening of the day at 10 am and selling the whole lot at the close of the day at 3 pm. Bikram follows the strategy of buying at hourly intervals: 10 am, 11am, 12 noon, 1 pm. And 2 pm, and selling the whole lot at the close of the day. Further, he buys an equal number of shares in each purchase. Chetan follows a similar pattern as Bikram but his strategy is somewhat different. Chetan's total investment amount is divided equally among his purchases. The profit or loss made by each investor is the difference between the sale value at the close of the day less the investment in

purchase. The “return” for each investor is defined as the ratio of the profit or loss to the investment amount expressed as a percentage.

5. On a day of fluctuating market prices, the share price of XYZ Ltd. ends with a gain, i.e, it is higher at the close of the day compared to the opening value. Which trader got the maximum return on that day?
 (1) Bikram (2) Chetan (3) Abdul (4) Cannot be determined

6. Which one of the following statements is always true?
 (1) Abdul will not be one with the minimum return (2) Return for Chetan will be higher than that of Bikram
 (3) Return for Bikram will be higher than that of Chetan (4) none of the above

7. On a “boom” day the share price of XYZ Ltd. keeps rising throughout the day and peaks at the close of the day. Which trader got the minimum return on that day? (1) Bikram (2) Chetan (3) Abdul (4) Abdul or Chetan

8. On a “bear” day the share price of XYZ Ltd. keeps falling throughout the day and is lowest at the close of the day. Which trader got the maximum return on that day? (1) Bikram (2) Chetan (3) Abdul (4) Abdul or Chetan

Read the below data carefully and answer the following questions
 The chart below shows the number of days taken by six boys and girls to complete a work.

Boy	Days	Girl	Days
Punit	12	Purvi	10
Ashu	15	Neha	24
Nikku	10	Hema	15
Pulkit	9	Happy	24
Pradeep	12	Ruhi	9
Paras	9	Suman	20

9. If pulkit and paras started to work and after 2 days they were replaced by neha, ruhi and happy then they stopped , how much work is still left ? (Neha, Ruhi and Happy worked for 2 days together)
 A) 1/10 B) 1/6 C) 1/9 D) 1/12

10. If all the boys work together then time taken by them will be how much less than the time taken by purvi, hema , neha and happy together to do the work ?
 A) $2 * \frac{2}{5}$ days B) $2 * \frac{3}{5}$ days C) $2 * \frac{1}{5}$ days D) $2 * \frac{4}{5}$ days

11. Pradeep and Nikku started work. Pradeep worked at 120% of his efficiency and Nikku at 5/6 of his normal routine work. They started work on alternate days starting with Pradeep. How many days will be taken by them to complete the work? A) $10 * \frac{4}{5}$ days B) $10 * \frac{5}{6}$ days C) $10 * \frac{3}{4}$ days D) 11 days

12. How many days will it take to complete the work if Punit does the 25% of the work alone and 10% is done by Nikku alone and the remaining is done by Suman ??
 A) 19 days B) 16 days c) 13 days D) 17 days

Five horses, Red, White, Grey, Black and Spotted participated in a race. As per the rules of the race, the persons betting on the winning horse get four times the bet amount and those betting on the horse that came in second get thrice the bet amount. Moreover, the bet amount is returned to those betting on the horse that came in third, and the rest lose the bet amount. Raju bets Rs. 3000, Rs. 2000 and Rs. 1000 on Red, White and Black horses respectively and ends up with no profit and no loss.

13. Which of the following cannot be true?
 (1) At least two horses finished before Spotted (2) Red finished last (3) There were three horses between Black and Spotted
 (4) There were three horses between White and Red

14. Suppose, in addition, it is known that Grey came in fourth. Then which of the following cannot be true?
 (1) Spotted came in first (2) Red finished last (3) White came in second (4) Black came in second

15. Suppose, in addition, it is known that White came in Second. Then which of the following must be true?
 (1) Spotted came in first (2) Red finished last (3) Grey came in last (4) Black or Red came in last

16. Suppose, in addition, it is known that Red came in last.
 Then which of the following must be true?
 (1) Spotted came in first or Second (2) White finished 2nd or 3th.
 (3) Grey came in last or 4th (4) None of these

Overall DILR Strategy		
Correct	Percentile	Time / set
6	90	30
8	95	15
10	99	10
12	99.5	7.5

For admission to various affiliated colleges, a university conducts a written test with four different sections, each with a maximum of 50 marks. The following table gives the aggregate as well as the sectional cut-off marks fixed by six different colleges affiliated

CAT 2018 Expected paper

to the university. A student will get admission only if he/she gets marks greater than or equal to the cut-off marks in each of the sections and his/her aggregate marks are at least equal to the aggregate cut-off marks as specified by the college.

College	Sectional Cut – off Marks				Aggregate Cut-off Marks
	A. Quant	B. Verbal	C. Logic	D. DI	
College 1	42	42	42		176
College 2		45	45		175
College 3			46		171
College 4	43			45	178
College 5	45		43		180
College 6		41		44	176

17. Ramaya got calls from all colleges. What could be the minimum aggregate marks obtained by her? ____

18. Gauri got calls from two colleges. What could be the minimum marks obtained by him in a section? ____

19. Minakshi did not get a call from even a single college. What could be the maximum aggregate marks obtained by him? ____

20. What is the maximum score required by a Cetking student in Section D so that student clear all colleges cut-off?__

The Dean's office recently scanned student results into the central computer system. When their character reading software cannot read something, it leaves the space blank. The scanner output reads as follows:

In the grading system, A, B, C, D, and F grades fetch 6, 4, 3, 2, and 0 grade points respectively. The Grade Point Average (GPA) is the arithmetic mean of the grade points obtained

in the five subjects. For example Nisha's GPA is $(6 + 2 + 4 + 6 + 0) / 5 = 3.6$. Some additional facts are also known about the students' grades. These are (a) Vipul obtained the same grade in Marketing as Aparna obtained in Finance and Strategy. (b) Fazal obtained the same grade in Strategy as Utkarsh did in Marketing. (c) Tara received the same grade in exactly three courses.

Name	Finance	Marketing	Statistics	Strategy	Operations	GPA
Aparna		B	F			1.4
Bikas	D	D	F	F		
Chandra		D	A	F	F	2.4
Deepak	A	B		D	D	3.2
Fazal	D	F	B		D	2.4
Gowri	C	C	A		B	3.8
Hari		B	A		D	2.8
Ismet			B		A	
Jagdeep	A	A	B		C	3.8
Kunal	F		A	F	F	1.8
Leena	B	A		B	F	3.2
Manab			A	B	B	
Nisha	A	D	B	A	F	3.6
Osman	C		B	B	A	4.6
Preeti	F	D		D		3.2
Rahul	A	C	A		F	4.2
Sameer		C	F	B		
Tara	B					2.4
Utkarsh			F	C	A	3
Vipul	A		C	C	F	2.4

21. What grade did Preeti obtain in Statistics? (1) A (2) B (3) C (4) D

22. In operations, Tara could have received the same grade as (1) Ismet (2) Hari (3) Jagdeep (4) Manab

23. In Strategy, Gowri's grade point was higher than that obtained by (1) Fazal (2) Hari (3) Nisha (4) Rahul

24. What grade did Utkarsh obtain in Finance? (1) B (2) C (3) D (4) F

Answer the questions on the basis of the information given below. Coach John sat with the score cards of Indian players from the 3 games in a one-day cricket tournament where the same set of players played for India and all the major batsmen got out. John summarized the batting performance through three diagrams, one for each game. In each diagram, the three outer triangles communicate the number

of runs scored by the three top scorers from India, where K, R, S, V, and Y represent Kaif, Rahul, Saurav, Virender, and Yuvraj respectively. The middle triangle in each diagram denotes the percentage of the total score that was scored by the top three Indian scorers in that game. No two players score the same number of runs in the same game. John also calculated two batting indices for each player based on his scores in the tournaments; the R-index of a batsman is the difference between his highest and lowest scores in the 3 games while the M-index is the middle number, if his scores are arranged in a non-increasing order.

25. For how many Indian players is it possible to calculate the exact M-index? (1) 0 (2) 1 (3) 2 (4) More than 2
26. Among the players mentioned, who can have the lowest R-index from the tournament?
(1) Only Kaif, Rahul or Yuvraj (2) Only Kaif or Rahul (3) Only Kaif or Yuvraj (4) Only Kaif
27. How many players among those listed definitely scored less than Yuvraj in the tournament?
(1) 0 (2) 1 (3) 2 (4) More than 2
28. Which of the players had the best M-index from the tournament? (1) Rahul (2) Saurav (3) Virender (4) Yuvraj

Answer the questions on the basis of the information given below. Prof. Singh has been tracking the number of visitors to his homepage. His service provider has provided him with the following data on the country of origin of the visitors and the university they belong to:

COUNTRY	Number of visitors		
	DAY		
	1	2	3
Canada	2	0	0
Netherlands	1	1	0
India	1	2	0
UK	2	0	2
USA	1	0	1

UNIVERSITY	Number of visitors		
	DAY		
	1	2	3
University 1	1	0	0
University 2	2	0	0
University 3	0	1	0
University 4	0	0	2
University 5	1	0	0
University 6	1	0	1
University 7	2	0	0
University 8	0	2	0

29. To which country does University 5 belong?
(1) India or Netherlands but not USA (2) India or USA but not Netherlands (3) Netherlands or USA but not India (4) India or USA but not UK
30. University 1 can belong to (1) UK (2) Canada (3) Netherlands (4) USA
31. Which among the listed countries can possibly host three of the eight listed universities?
(1) None (2) Only UK (3) Only India (4) Both India and UK
32. Visitors from how many universities from UK visited Prof. Singh's homepage in the three days? (1) 1 (2) 2 (3) 3 (4) 4

Numbers	4

1. A person who has a certain amount with him goes to market. He can buy 50 oranges or 40 mangoes. He retains 10% of the amount for taxi fares and buys 20 mangoes and of the balance he purchases oranges. Number of oranges he can purchase is a. 36 b. 40 c. 15 d. 20
2. $\frac{2}{5}$ of the voters promise to vote for P and the rest promised to vote for Q. Of these, on the last day 15% of the voters went back of their promise to vote for P and 25% of voters went back of their promise to vote for Q, and P lost by 2 votes. Then the total number of voters is

Type in the answer here: _____

3. A stockist wants to make some profit by selling sugar. He contemplates about various methods. Which of the following would maximise his profit?
 I. Sell sugar at 10% profit. II. Use 900 g of weight instead of 1 kg. III. Mix 10% impurities in sugar and selling sugar at cost price. IV. Increase the price by 5% and reduce weights by 5%.

- a. I or III b. II c. II, III and IV d. Profits are same
4. For the product $n(n + 1)(2n + 1)$, $n \in \mathbb{N}$, which one of the following is not necessarily true?
 a. It is even b. Divisible by 3
 c. Divisible by the sum of the square of first n natural numbers d. Never divisible by 237

5. ABCD is a square of area 4 with diagonals AC and BD, dividing square into 4 congruent triangles. Break them into four non-overlapping triangles. Then the sum of the perimeters of the triangles is
 a. $8(2 + \sqrt{2})$ b. $8(1 + \sqrt{2})$ c. $4(1 + \sqrt{2})$ d. $4(2 + \sqrt{2})$

6. PQRS is a square. SR is a tangent (at point S) to the circle with centre O and $TR = OS$. Then the ratio of area of the circle to the area of the square is
 a. $\pi/3$ b. $11/7$ c. $3/\pi$ d. $7/11$

7. From a circular sheet of paper with a radius 20 cm, four circles of radius 5 cm each are cut out. What is the ratio of the uncut to the cut portion?
 a. 1 : 3 b. 4 : 1 c. 3 : 1 d. 4 : 3

8. A wooden box (open at the top) of thickness 0.5 cm, length 21 cm, width 11 cm and height 6 cm is painted on the inside. The expenses of painting are Rs. 70. What is the rate of painting per square centimetres?
 a. Re 0.7 b. Re 0.5 c. Re 0.1 d. Re 0.2

9. The cost of diamond varies directly as the square of its weight. Once, this diamond broke into four pieces with weights in the ratio 1 : 2 : 3 : 4. When the pieces were sold, the merchant got Rs. 70,000 less. Find the original price of the diamond.

Type in the answer here: _____

10. The figure shows the rectangle ABCD with a semicircle and a circle inscribed inside in it as shown. What is the ratio of the area of the circle to that of the semicircle?
 a. $(\sqrt{2} - 1)^2 : 1$ b. $2(\sqrt{2} - 1)^2 : 1$ c. $(\sqrt{2} - 1)^2 : 2$ d. None of these

11. In a mile race, Akshay can be given a start of 128 m by Bhairav. If Bhairav can give Chinmay a start of 4 m in a 100 m dash, then who out of Akshay and Chinmay will win a race of one and half miles, and what will be the final lead given by the winner to the loser? (One mile is 1,600 m.)
 a. Akshay, 1/12 mile b. Chinmay, 1/32 mile c. Akshay, 1/24 mile d. Chinmay, 1/16 mile

12. Two liquids A and B are in the ratio 5 : 1 in container 1 and 1 : 3 in container 2. In what ratio should the contents of the two containers be mixed so as to obtain a mixture of A and B in the ratio 1 : 1?
 a. 2 : 3 b. 4 : 3 c. 3 : 2 d. 3 : 4

13. If $x^2 + y^2 = 0.1$ and $|x - y| = 0.2$, then $|x| + |y|$ is equal to
 a. 0.3 b. 0.4 c. 0.2 d. 0.6

14. ABCD is a rhombus with the diagonals AC and BD intersecting at the origin on the x-y plane. The equation of the straight line AD is $x + y = 1$. What is the equation of BC?
 a. $x + y = -1$ b. $x - y = -1$ c. $x + y = 1$ d. None of these

15. The set of all positive integers is the union of two disjoint subsets: $\{f(1), f(2), \dots, f(n), \dots\}$ and $\{g(1), g(2), \dots, g(n), \dots\}$, where $f(1) < f(2) < \dots < f(n) < \dots$, and $g(1) < g(2) < \dots < g(n) < \dots$, and $g(n) = f(f(n)) + 1$ for all $n \geq 1$. What is the value of $g(1)$?

Type in the answer here: _____

16. For all non-negative integers x and y , $f(x, y)$ is defined as below.
 $f(0, y) = y + 1$; $f(x + 1, 0) = f(x, 1)$; $f(x + 1, y + 1) = f(x, f(x + 1, y))$.
 Then what is the value of $f(1, 2)$?

Type in the answer here: _____

17. In the figure above, $AB = BC = CD = DE = EF = FG = GA$.
Then $\angle DAE$ is approximately

Type in the answer here: _____

18. A water tank has three taps A, B, and C. A fills four buckets in 24 mins, B fills 8 buckets in 1 hour and C fills 2 buckets in 20 minutes. If all the taps are opened together a full tank is emptied in 2 hours. If a bucket can hold 5 litres of water, what is the capacity of the tank in litres?

Type in the answer here: _____

19. Shyam went from Delhi to Shimla via Chandigarh by car. The distance from Delhi to Chandigarh is $\frac{3}{4}$ times the distance from Chandigarh to Shimla. The average speed from Delhi to Chandigarh was half as much again as that from Chandigarh to Shimla. If the average speed for the entire journey was 49 kmph. What was the average speed from Chandigarh to Shimla? (a) 39.2 kmph (b) 63 kmph (c) 42 kmph (d) None of these

20. Fourth term of an arithmetic progression is 8. What is the sum of the first 7 terms of the arithmetic progression?
(a) 7 (b) 64 (c) 56 (d) Cannot be determined

21. Two towns A and B are 100 km apart. A school is to be built for 100 students of town B and 30 students of Town A. Expenditure on transport is Rs. 1.20 per km per student. If the total expenditure on transport by all 130 students is to be as small as possible, then the school should be built at

(a) 33 km from Town A (b) 33 km from Town B (c) Town A (d) Town B

22. In a bag, there are coins of 25 p, 10 p and 5 p in the ratio of 1 : 2 : 3. If there is Rs. 30 in all, how many 5 p coins are there?

A. 50 B.100 C. 150 D.200

23. Let $u_{n+1} = 2u_n + 1 (n=0,1,2,...)$ and $u_0 = 0$. Then u_{10} nearest to

Type in the answer here: _____

24. Let $x < 0.50$, $0 < y < 1$, $z > 1$. Given a set of numbers, the middle number, when they are arranged in ascending order, is called the median. So the median of the numbers x , y , and z would be

(a) less than one (b) between 0 and 1 (c) greater than 1 (d) cannot say

25. The price of Maruti car rises by 30 percent while the sales of the car come down by 20%. What is the percentage change in the total revenue? A. - 4% B. - 2% C. + 4% D. + 2%

26. Let $x < 0$, $0 < y < 1$, $z > 1$. Which of the following may be false?

(a) $(x^2 - z^2)$ has to be positive. (b) yz can be less than one. (c) xy can never be zero. (d) $(y^2 - z^2)$ is always negative.

27. A young girl counted in the following way on the fingers of her left hand. She started calling the thumb 1, the index finger 2, middle finger 3, ring finger 4, little finger 5, then reversed direction, calling the ring finger 6, middle finger 7, index finger 8, thumb 9, then back to the index finger for 10, middle finger for 11, and so on. She counted up to 1994. She ended on her. (a) thumb (b) index finger (c) middle finger (d) ring finger

28. In a mixture 60 litres, the ratio of milk and water 2 : 1. If this ratio is to be 1 : 2, then the quantity of water to be further added is: A. 20 litres B. 30 litres C. 40 litres D. 60 litres

29. The number of solutions of the equation $2x + y = 40$ where both x and y are positive integers and $x \leq y$ is:

Type in the answer here: _____

30. If $\log_y x = (a \cdot \log_z y) = (b \cdot \log_x z) = ab$, then which of the following pairs of values for (a, b) is not possible?

(1) $(-2, 1/2)$ (2) $(1, 1)$ (3) $(\pi, 1/\pi)$ (4) $(2, 2)$

31. When you reverse the digits of the number 13, the number increases by 18. How many other two digit numbers increase by 18 when their digits are reversed?

Type in the answer here: _____

32. The salaries A, B, C are in the ratio 2 : 3 : 5. If the increments of 15%, 10% and 20% are allowed respectively in their salaries, then what will be new ratio of their salaries?

A. 3 : 3 : 10 B.10 : 11 : 20 C.23 : 33 : 60 D.Cannot be determined

33. Amol was asked to calculate the arithmetic mean of 10 positive integers, each of which had 2 digits. By mistake, he interchanged the 2 digits, say a and b , in one of these 10 integers. As a result, his answer for the arithmetic mean was 1.8 more than what it should have been. Then $b - a$ equals 1

Type in the answer here: _____

34. The angle of elevation of the top of a tower 30 m high, from two points on the level ground on its opposite sides are 45 degrees and 60 degrees. What is the distance between the two points?

- (1) 30 (2) 51.96 (3) 47.32 (4) 81.96
